## Course Information

[Syllabus](#)

[Academic-Integrity Policy](#)

[Challenge-Problem Policy](#)

[Relation to Coursera Course](#)

[Gradebook](#)

Lecture: Monday, Wednesday, Friday 12:30-1:20 EEB 037

Section AA: Thursday 12:30-1:20, SIG 134

Section AB: Thursday 1:30-2:20, SIG 134

Office Hours:

Josiah Adams, Mondays 11:30-12:30, department labs CSE002 (Allen Center basement)

Dan Grossman, Tuesdays 11:00-Noon + appointment + try coming by (*please visit!*), Allen Center 574

Amaris Chen, Wednesdays 2:30-3:30, department labs CSE002 (Allen Center basement)

Patrick Larson, Fridays 1:30-2:30, department labs CSE002 (Allen Center basement)

## Contact Information

[Course Email List](#) (mandatory): You should receive email sent to the course mailing list regularly, roughly at least once a day. Any important announcements will be sent to this list.

Email sent to [cse341-staff@cs.washington.edu](mailto:cse341-staff@cs.washington.edu) will reach the instructor and all the TAs. For questions multiple staff members can answer, we encourage you to use this email so that you get a quicker reply and the whole staff is aware of points of confusion.

Course staff:

All staff: **[cse341-staff@cs.washington.edu](mailto:cse341-staff@cs.washington.edu)**

Instructor: Dan Grossman, [djg](mailto:djg@cs.washington.edu) and then at and then [cs.washington.edu](http://cs.washington.edu)

TA: Amaris Chen, [amarisch](mailto:amarisch@cs.washington.edu) and then at and then [cs.washington.edu](http://cs.washington.edu)

TA: Patrick Larson, [palarson](mailto:palarson@cs.washington.edu) and then at and then [cs.washington.edu](http://cs.washington.edu)

TA: Josiah Adams, [josiaha](mailto:josiaha@cs.washington.edu) and then at and then [cs.washington.edu](http://cs.washington.edu)

[Course Discussion Board](#) (optional)

[Anonymous Feedback](#) (goes only to the instructor)

## Course Materials

Material in the future naturally subject to change in terms of coverage or schedule

## Unit 1: ML Functions, Tuples, Lists, and More [Reading Notes](#) [Videos](#)

L1. Apr 1-3: Course Mechanics, ML Variable Bindings slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

L2. Apr 3-5: Functions, Pairs, Lists slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

S1. Apr 4: Emacs, SML Mode, Shadowing, Error Messages slides: [pptx](#) [pdf](#) code: [errors](#) [errors fixed](#)

L3. Apr 5-8: Local Bindings, Options, Benefits of No Mutation slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

## Unit 2: Datatypes, Pattern Matching, Tail Recursion, and More [Reading Notes](#) [Videos](#)

L4. Apr 8-10: Records, Datatypes, Case Expressions slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

L5. Apr 10: More Datatypes and Pattern Matching slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

S2. Apr 11: Type Synonyms, Polymorphism, & More slides: [pptx](#) [pdf](#) code: [sml](#)

L6. Apr 12-15: Nested Pattern-Matching, Exceptions, Tail Recursion slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

## Unit 3: First-Class Functions and Closures [Reading Notes](#) [Videos](#)

L7. Apr 15-17: First-Class Functions slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

L8. Apr 19: Lexical Scope and Function Closures slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

S3. Apr 18: Standard-Library Docs, Unnecessary Function Wrapping, Fold & More slides: [pptx](#) [pdf](#) code: [sml](#)

L9. Apr 22: Function-Closure Idioms slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

## Unit 4: ML Modules, Type Inference, Equivalence, & More [Reading Notes](#) [Videos](#)

L10. Apr 24: ML Modules slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

S4. Apr 25: Mutual Recursion, More Currying, More Modules slides: [pptx](#) [pdf](#) code: [sml](#)

L11. Apr 26-29: Type Inference slides: [pptx](#) [pdf](#) [pdf6up](#) code: [sml](#)

L12. Apr 29: Equivalence slides: [pptx](#) [pdf](#) [pdf6up](#)

## Course-Motivation Interlude, May 1 [slides](#) [pdf](#) [pdf6up](#) [Videos](#)

## Unit 5: Racket, Delaying Evaluation, Memoization, Macros [Reading Notes](#) [Videos](#)

L13. Feb May 1-6: Racket Introduction slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#)

L14. Feb May 8: Thunks, Laziness, Streams, Memoization slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#)

*Some of the material in L14 is covered in S6 instead*

S6. May 9: More streams, memoization, etc. annotated code: [rkt](#)

L15. May 10: Macros slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#)

## Unit 6: Structs, Implementing Languages, Static vs. Dynamic Typing [Reading Notes](#) [Videos](#)

L16. May 13: Datatype-Style Programming With Lists or Structs slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#) [sml](#)

L17. May 15: Implementing Languages Including Closures slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#)

*Some of the material in L17 is covered in S7 instead*

S7. May 16: Legal ASTs, Macros as Functions, and More pptx: [pptx](#) pdf: [pdf](#)

L18. May 15,17,20: Static vs. Dynamic Typing slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rkt](#) [sml](#)

## Unit 7: Ruby, Object-Oriented Programming, Subclassing [Reading Notes](#) [Videos](#)

L19. May 20-22: Introduction to Ruby and OOP slides: [pptx](#) [pdf](#) [pdf6up](#) code: [lec19\\_silly.rb](#) [lec19\\_example.rb](#)

S8. May 23: Ruby arrays, hashes, ranges, blocks, and more annotated code: [rb](#)

L20. May 24: Arrays & Such, Blocks & Procs, Inheritance & Overriding slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rb](#)

*Some of the material in L20 is covered in S8 instead*

L21. May 24-29: Dynamic Dispatch Precisely, & Manually in Racket slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rb](#) [sml](#) [rkt](#)

## Unit 8: Program Decomposition, Mixins, Subtyping, and More [Reading Notes](#) [Videos](#)

L22. May 29-31: OOP vs. Functional Decomposition; Adding Operators & Variants; Double-Dispatch

slides: [pptx](#) [pdf](#) [pdf6up](#) code stage A: [sml](#) [rb](#) [java](#) code stage B: [sml](#) [rb](#) [java](#) code stage C: [sml](#) [rb](#) [java](#)

S9. May 30: Double-Dispatch, Mixins, and Visitors slides: [pptx](#) [pdf](#) code: [sml](#) [rb](#)

L23. May 31: Multiple Inheritance, Mixins, Interfaces, Abstract Methods slides: [pptx](#) [pdf](#) [pdf6up](#) code: [rb](#)

L24. June 3-5: Subtyping slides: [pptx](#) [pdf](#) [pdf6up](#)

L25. June 5: Subtyping for OOP; Comparing/Combining Generics and Subtyping slides: [pptx](#) [pdf](#) [pdf6up](#)

S10. June 6: Review, Especially Subtyping slides: [pptx](#) [pdf](#)

L26. June 7: Course Victory Lap slides: [pptx](#) [pdf](#) [pdf6up](#)

# Homework Assignments

[Homework 0](#): on-line survey worth 0 points, "due" Wednesday April 3

[Dropbox for homework turn-in](#)

[Homework 1](#) due Wednesday April 10, 11PM

[Homework 2](#) due Friday April 19, 11PM [provided code](#) [provided tests](#)

[Homework 3](#) due Monday April 29, 11PM [provided code](#)

[Homework 4](#) due Tuesday May 14, 11PM [provided code](#) [provided tests](#)

sample image files: [dan.jpg](#) [curry.jpg](#) [dog.jpg](#) [dog2.jpg](#)

[Homework 5](#) due Wednesday May 22, 11PM [provided code](#) [provided tests](#)

[Homework 6](#) due Thursday May 30, 11PM

[hw6graphics.rb](#) [hw6provided.rb](#) [hw6runner.rb](#) [hw6assignment.rb](#)

[Homework 7](#) due Friday June 7, 11PM

[hw7.sml](#) [hw7.rb](#) [hw7testspublished.sml](#) [hw7testspublished.rb](#)

## Exams

Midterm: Friday May 3, in class [unsolved](#) [solved](#)

Sample midterms:

Winter 2013 [unsolved](#) [solved](#)

Fall 2011 [unsolved](#) [solved](#)

Spring 2011 [unsolved](#) [solved](#)

Spring 2008 [unsolved](#) [solved](#)

Winter 2008 [unsolved](#) [solved](#)

Final: Thursday June 13, 8:30-10:20 [unsolved](#) [solved](#)

Sample finals:

Winter 2013 [unsolved](#) [solved](#)

Fall 2011 [unsolved](#) [solved](#)

Spring 2011 [unsolved](#) [solved](#)

Spring 2008 [unsolved](#) [solved](#)

Winter 2008 [unsolved](#) [solved](#)

## Software Installation and Use

[Instructions for SML and Emacs](#), which is everything you need for the first half of the course.

[Videos](#) showing the software installation on Windows

[Instructions for Racket and DrRacket](#)

[Instructions for Ruby and irb](#)

## Links to Other Resources

The course materials on this page (lectures, sections, homeworks, installation instructions, videos) are designed to provide what you need for the course except for some details that you can look up in standard-library documentation or users' guides for particular languages. Links for such information is below. We also provide links to useful books and tutorials that provide alternate explanations. We will not follow any textbooks closely, but you may still find them valuable. Suggestions for additional links are welcome.

SML resources:

[www.smlnj.org](http://www.smlnj.org) (links to many things, including the next three resources)

[user's guide](#)

[standard-library documentation](#)

[tutorials, books, and documentation](#)

[Elements of ML Programming, ML'97 Edition](#), Jeffrey D. Ullman, 1998.

*This is a textbook that takes a different approach but does cover some of the same material.*

Check the [errata page](#) to avoid bugs.

*Approximately Chapters 2, 3.1-3.4, 5.1-5.5 (skip 5.2.5, 5.3.4, 5.4.4), 6.1-6.2, 7.1, 8.2, 8.5.5 overlap with the course material.*

Racket resources:

[The Racket Guide](#)

*Approximately Chapters 1-4.9.1 (skip 2.4.1-2.4.3, 3.5-3.12, 4.4.3, 4.4.4, 4.6.5), 5.1, 5.2, 6.1-6.5 (skip 6.3), 16.1-16.1.4 overlap with the course material. We might cover some of 7.1, 7.2, 15.1.*

[racket-lang.org](#), particularly the Documentation and Learning tabs

Ruby resources:

[Programming Ruby 1.9: The Pragmatic Programmers' Guide \(Facets of Ruby\)](#), Dave Thomas et al, 2009.

Check the [errata page](#) to avoid bugs.

*Overlap with the course material is very roughly Chapter 1 through 9 except Chapter 7.*

*We will be using Ruby 1.9. While there are significant differences between 1.8 and 1.9 in the language, a 1.8 version of the book below is still a fine resource if that's the one you happen to have.*

[ruby-doc.org](#), including links for the [library documentation](#) and various books. You can even buy the t-shirt.

[Ruby home page](#)

[list compiled by Stuart Reges for Spring 2010's CSE341](#), including lecture slides
